This insulated Outdoor Emergency *Narcan Station prototype was built by members of the Bruderhof community in Rifton, NY, at the request of the New Paltz Opioid Overdose Prevention and Response Team (NPOOPRT), as part of its increased overdose prevention strategies for the New Paltz Community. Members of the NPOOPRT have identified outdoor locations within the Town and Village of New Paltz where having naloxone (*Narcan is the known brand utilized in the kits) accessible, may assist in saving the life of community members experiencing an opioid overdose. The NPOOPRT is seeking permission and assistance installing these stations from local government offices in New Paltz. The NPOOPRT will reach out to property owners of the various properties identified by the team to seek permission for these units to be installed on these properties.
