

For publication 5/4/17 and 5/11/17:

Small municipal stormwater sewer systems (MS4s) that are located within the boundaries of a Census Bureau defined "urbanized area" are regulated under EPA's Phase II Stormwater Rule. As a designated small MS4, the Town of New Paltz developed a stormwater management program (SWMP) in 2013 which aims to reduce the amount of pollutants carried by stormwater during storm events. As a requirement of the program, the Town is required to submit an annual report to the DEC by June 1<sup>st</sup> of each year. The draft MS4 Annual Stormwater Report is now available on the Town's website for those interested to review. Public comments and questions will be discussed at the Town Board meeting on May 18, 2017.
