

October 26, 2021

Dear Residents of the Plains Road Water District:

The Town of New Paltz is now in the position to move forward with the construction of the Plains Road Water District. We have signed contracts with:

Merritt Construction for the water distribution and house service piping;

Butler Construction Group, DJ Heating & Cooling, and CDE Electric for the Water Treatment Plant;

Chazen, a LaBella Company, as the Construction Manager for the project during construction; and

Barton & Loguidice will continue as the Engineer-of-Record for the project.

The actual construction will commence as soon as the contractors have provided all necessary documents, schedules, and submittals. The water distribution piping will be constructed first, since that all needs to be installed, tested, chlorinated, and disinfected. Simultaneously, the Water Treatment Plant will be started on-site.

After the distribution piping has been completed, the actual house services will be started.

Development of the new water system is largely being funded by \$10.5 million from the New York City DEP. Our contract with DEP requires the wellfield and distribution mains to be constructed and fully tested by late summer 2022.

Until the construction trailer is onsite, you may reach out or to Gary Aber of Chazen at (914) 474-1303, or to the Supervisor's Office at (845) 255-0604 x126. Please feel free to reach out with your questions. After the construction trailer is onsite, Chazen will have a Resident Engineer onsite to meet with residents and manage the ongoing construction on a day-to-day basis.

After we have committed schedules from the contractors, the Town and Chazen will hold an informational meeting for residents. Please fill out and return the attached contact form so that we may contact you about future informational meetings and questions specific to your needs.

Sincerely,

A handwritten signature in black ink that reads "Neil Bettez".

Neil Bettez

Town Supervisor
